The 3rd. DSTC-Japan course

Dear Colleagues,

I am writing to invite you a unique opportunity in Trauma Surgery and Education. Definitive Surgical Trauma Care Course (DSTC-TM), exclusively for surgeons to be held from 27th June 2013 to 29th June 2014 at Teikyo University, Tokyo, Japan. It will be held as a post congress course of the 28th Annual Meeting of the Japanese Association for the Surgery of Trauma.

The DSTC-TM Course is presented on behalf of the International Association for the Surgery of Trauma and Surgical Intensive Care – IATSIC. IATSIC is part of the International Society of Surgery and since 1988 has become the international forum for trauma surgery. Other courses have been conducted around the world.

The course is designed to assist surgeons in their involvement in acute surgery and decisions relating to serious trauma. It assumes all of the ATLS® principles and builds on them. If ATLS® deals with the “first hour”, this course will deal with the “second hour”. It is a response to the lack of written material and teaching on strategic issues of surgical resuscitation, early definitive care and surgical priorities.

A course program is attached. Participation is limited to sixteen registrants only. Course details are as follows:

DSTC Course Fee: 180,000JPY

Dates of Course: From 27th to 29th June. 2014

Venue: Teikyo University, 2-11-1 Kaga, Itabashi, Tokyo, 113-8606, Japan

Accommodation if required will be at your cost, and we can advise you regarding suitable places.

This is a rare opportunity for a small group of surgeons to work intensively with a teaching faculty with this depth of experience and international perspective.

If you are interested in the above course please fill in the application and send it into us.

Acceptance or rejection for participation will be send via email to you by the end of April, 2014.

I do hope you can join us.

Yours sincerely,

Takashi FUJITA MD, DMedSc. FACS

DSTC-Japan coordinator
